

**WHAT IS CLAIMED IS:**

1. A fabric treatment applicator comprising an application device and a fabric treatment composition, the fabric treatment composition comprising a radical scavenger and a chelating agent.
2. An applicator according to Claim 1 wherein said application device has a frictional stress value from  $0.05 \text{ N mm}^{-2}$  to  $10 \text{ N mm}^{-2}$ .
3. An applicator according to Claim 1 wherein said application device is a nib.
4. An applicator according to Claim 1, wherein said fabric treatment composition further comprises a peroxide bleach.
5. An applicator according to Claim 1, wherein said composition further comprises at least 70% of water.
6. A method of removing a stain from fabric comprising the step of contacting said fabric with a fabric treatment composition comprising a radical scavenger and a chelating agent, without rinsing said fabric treatment composition from said fabric.
7. A method according to Claim 6 wherein said fabric treatment composition contacts said fabric via a fabric treatment applicator comprising an application device and said fabric treatment composition.
8. A method according to Claim 7 wherein said application device has a frictional stress value of from  $0.05 \text{ N mm}^{-2}$  to  $10 \text{ N mm}^{-2}$ .

9. A method according to Claim 7 wherein said application device is a nib.
10. A method according to Claim 7 wherein said fabric treatment composition further comprises a peroxide bleach.
11. A method according to Claim 7 wherein said fabric treatment composition further comprises at least 70% of water.
